

# PREMIERE

POWERED BY SURFNET™

## Premiere

### Clients' List:

- Circle K
- Exxon Mobil
- Macs / Couchetard
- US Army, Navy and Marines
- Hostelling International
- California Lottery
- Helsinki - Vantua Airport

### Key Features:

Surfnet Payments enables any kiosk to collect cash payments for bills, money transfers, re-valuing prepaid credit cards, event ticketing and even donations. Premiere is the only commercially available software package that has proven its ability to collect payments using cash acceptors and reconcile perfectly with inventory sources.

### Premiere Powered by Surfnet

Premiere encapsulates the most advanced transactional kiosk technology available. Developed by the world leader in successful kiosk deployments - Info Touch Technologies - Premiere is the wise choice for anyone investigating the explosion of revenue opportunities recently created by transactional payout systems, prepaid services and most recently wireless technologies such as Wi-Fi (802.116 protocol).

The power behind Premiere - Surfnet - enjoys worldwide brand recognition with over 10,000 installations in more than 55 countries. It is the mastermind behind the most successful and prominent kiosks in the industry. Companies such as the U.S. Army and Military, Mac's/Couchtard, Exxon Mobil and Circle K chose Premiere because it has the tools, power and flexibility needed for kiosk success.

**Robust? You bet! Premiere has the only true scalable enterprise grade software management capabilities.**

Users love the simple and completely customizable graphical interface of Premiere. That's one of the reason for its unprecedented success. But you will love it because when you

choose Premiere, the realms of possibilities are directed towards the most important part of kiosk ownership - creating revenue streams. Through our years of experience we can unlock the doors to satisfying returns on your investment.

We do our homework. We gather intelligence. With an intimate knowledge of business, customers and objective, we can help you select the appropriate technology as a base and guide you to the location(s) that will best serve your purpose. No other company can do this as well as we do.

- \* Premiere powers some of the largest kiosk networks across North America.
- \* Premiere powers the most profitable e-services project in a convenience store environment in the world today.
- \* Premiere has met and exceeded the security requirements of some of the most demanding and "security sensitive" organizations, such as the U.S. Military.

**Customization is our Cornerstone - Every single pixel can be customized.**

With Premiere, the GUI (graphical user interface) is only limited by your imagination. Premiere gives you complete graphical mastery of the software and even lets you embed files such as

## Key Features:

Prepaid Store is a ground breaking application. Premiere has the only patented PIN dispensing transaction engine. With Premiere you can sell any PIN based product such as:

- Prepaid long distance.
- Prepaid wireless top-up
- Prepaid mobile content (ringtones, games, graphics, etc.)
- prepaid Wi-Fi access
- Prepaid power (for participating utilities partners).
- Prepaid internet access.

video files (MPG, AVI, etc.) audio files (MP3), rotating gifs and graphics files (JPG, BMP, ec)

**Premiere has more ways to create income than any other kiosk management software.**

When we say that Premiere is tops when it comes to ability to earn revenue, we mean it. There is no other commercially available software that comes packed with so many features and built-in revenue streams. The possibilities are limitless.

Would you like your kiosk users to be able to pay their bills in cash? No problem. Would you like your kiosk users to pay for access to the web and their e-mail, and at the same time have access to free sites? No problem. Would you like them to be able to send video and photo e-mail? No problem. Ticketing, e-coupons and printing (free or with a charge)? Premiere is the one! How about offering users the ability to print local maps and directions? Yes, yes, yes! And we make it all look just the way you want it.

\* **Surfnet Payments** enables any kiosk to collect cash payments for bills, money transfers, re-valuing prepaid credit cards, event ticketing and even donations. Premiere is the only commercially available software package that has proven its ability to collect payments using cash acceptors and reconcile perfectly with inventory sources.

\* **Surfnet Wireless** converts a kiosk into a base station for wireless clients. Premiere not only enables cash and credit card payments for Wi-Fi consumers, it also simplifies the complete kiosk accounting by providing system administrators with consolidated billing reports.

\* **Prepaid Store** is a ground breaking application. Premiere has the only patented PIN dispensing transaction engine. With Premiere you can sell any PIN based product such as:

- Prepaid long distance.
- Prepaid wireless top-up

- Prepaid mobile content (ringtones, games, graphics, etc.)
- prepaid Wi-Fi access
- Prepaid power (for participating utilities partners).
- Prepaid internet access.

\* **Pay Per Use Module** gives you the ability to sell metered access to the internet using coin, bill, or credit card (with real time credit card authorization). You don't even need a merchant account! InfoTouch sends you the revenue checks every month!

\* **Interactive Maps & Directions** are possible with Premiere. Users can view and print maps of specific areas, get detailed directions to destinations, plan trips, or find nearby restaurants or hotels.

\* **Speak Your Mind** is a popular and entertaining public video e-mail application that allows users to post video e-mail messages for public view.

\* **Video E-mail** adds the option for users to send and receive video/audio e-mails (includes photo e-mail as an attachment).

\* **Pop 3/MS Exchange Mail Support** lets users check their Pop 3 e-mail or web based e-mail as well as MS based exchange server e-mail.

**Premiere is secure, reliable and manageable.**

The security features include locked down public access to software and CPU, a secure browser which acts as a wrapper for extra security built on Microsoft Internet Explorer, password triggered security levels, and protection for credit card information as well as the ability to destroy cookies and other similar files.

## Key Features:

Surfnet Wireless converts a kiosk into a base station for wireless clients. Premiere not only enables cash and credit card payments for Wi-Fi consumers, it also simplifies the complete kiosk accounting by providing system administrators with consolidated billing reports.
